FIELD CHANGE NOTICE

RV Power Outlet & Versa-Ped Redesign

August 2009

Effective immediately, all Milbank RV Power Outlet and Versa-Ped pedestals' receptacles/breakers will be **factory installed**. Receptacle kits will no longer be available for purchase. (Light kits will still be available for purchase.) Milbank pedestals in the field with the (now) obsoleted configuration will continue to be supported with replacement parts. Customers stocking blank pedestals and kits will be able to purchase additional kits to populate their blank pedestal units through October 1, 2009. Field repair parts will be available but not in kit form; they will be available as individual components.

The newly manufactured Milbank RV pedestals will be completely wired with receptacles and/or breakers and mounted behind a one-piece receptacle cover plate. This offers not only convenience to customers but is also a labor savings over field installation. Refer to the picture shown right as an illustration of the new design.

The affected model numbers are listed on the reverse side of this Field Change Notice.

**Single Multi-Position
Receptacle Cover**
