## Tap Connector

### #6-350 kcmil Connector with 100 Amp #12-1/0 Tap

Replaces the existing slide-in nut assembly on Milbank 200 amp sockets and allows for up to 100 amp tap connection in addition to the #6-350 kcmil connectors. Connectors designed for either line-side or load-side installation. Available with both internal and external hex set screws.

Ideal for line-side connection when incorporating renewable energy net metering that utilizes two meters. Also perfect for load-side 100 amp feeds to:

- Outdoor lighting
- Water well pumps
- Hot tubs
- Outbuildings
- Whole house surge suppressors
- Swimming pools

Contact Milbank for additional applications and details.
